TYRE CONTROL

- a) An envelope, with the relevant stickers in it, will be provided for each rider.
- b) The envelope will contain stickers for both the front and rear tyres, the FRONT stickers having WHITE numbers and the REAR having BLACK numbers.
- c) The stickers MUST be applied to the relevant tyre wall on the right hand side.
- d) The clear backing sheet MUST be removed after the sticker has been fixed on the tyre.
- e) It is not necessary to remove stickers from previous rounds.
- f) A tyre control area will operate at the pit exit and the rider must slow to walking pace to enable the team to confirm that the correctly coloured stickers are in place on both tyres and no machine will be allowed to join the track without them being in place. Failure to slow sufficiently to allow this check to be carried out will lead to the rider being black-flagged.
- g) Random checks will be carried out during each session, and in parc ferme, to confirm that the stickers used are those that were allocated to that rider.
- h) All tyres purchased at the meeting for use in the race will have manufacturers markings that identify them to the tyre control team and Pirelli staff.
- i) For the race checks will be carried out both on the grid and in parc ferme to confirm that only tyres purchased at the meeting are used

BRANDS HATCH GP SERVICE ROAD ACCESS/BIKE RECOVERY POINTS

NO RESTART AFTER CRASH

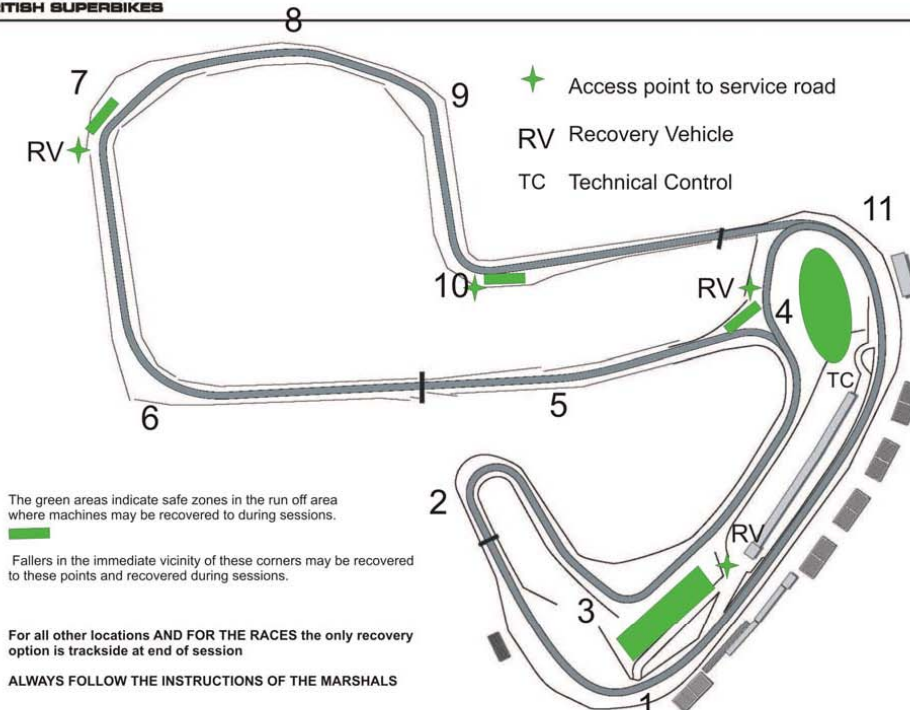

As per the 2019 MCRCB yearbook riders who fall from their machine are not permitted to continue in the practice session or race until passed fit by a Medical Officer (Ground Post or Medical Centre) and the machine re-inspected and cleared by Technical Control. Any infringement of this rule will result in the rider being disqualified from the remainder of the practice session or race and may result in further penalties.

EXCEPTIONS:

In the BSB (Superbike) and BSS (Supersport/GP2) classes only, in the event of a rider falling from their machine during any of the free and qualifying practices, and any of the sighting laps or warm up lap(s) and provided the machine has made negligible contact with the ground or a barrier, it may be possible for the rider to remount and continue back to the pit lane, PROVIDED that the following procedure is respected.

- 1. After the crash, and before continuing, the machine must be inspected by the marshals, including the chief marshal of the section who will make a determination and report the situation by radio to Race Control.**
- 2. Subject to approval being granted by Race Control, who will take into account the report of the marshal, the location of the incident, the closest available track exit and distance to the pit lane and any risk to disrupting the practice session or delay to the start of race – the rider may remount and continue around the circuit and a) during practice sessions leave the circuit at an exit or the pit lane as directed by the marshals, following the instructions of Race Control or, b) during sighting or warm up laps, enter the pit lane, keeping off of the racing line. In this situation riders must take great care, not hinder other riders and strictly observe blue flags.**
- 3. Once the rider has reached the pit lane/pit box, further repairs may be carried out under the supervision of a technical official. Once cleared by technical control the rider may exit the pit lane to continue the practice session or the sighting laps period if still in progress, or else in the case of a race, start the warm up lap from the pit lane in which case the rider will start the race from the back of the grid, or start the race from the pit lane exit. The last option to start the race from the pit lane exit expires when the leader crosses the finish line to complete the first racing lap.**

The decision of Race Control and instructions of the marshals is final. Penalties will be imposed for disregarding these and any actions that prejudice safety or the start procedure.

Further comments:

- a) *In the Superbike free practice one only, in the event of no fallers or technical retirements the session will run uninterrupted, save for red flag situations.*
- b) *If, five minutes before 50% point of the duration of the session there are machines that require recovering via the circuit the Race Director will advise (via the timing screens and teams radio) that he will interrupt the session by display of **red flag** at the 50% point. The machines will be then be recovered to Technical Control and the session restarted as soon as possible, lost time will not be added to the total session duration.*
- c) *If the session has been interrupted by the red flag prior to the 50% point in the session the session will not be further interrupted by the method described in (b) above.*
