

MCRCB Technical and Sporting Bulletin (20/01)**17 March**

- Testing Regulations

The BSB class has prescriptive testing regulations, in particular that 12 days of “in season” testing in the UK started on 16th March.

Given that the MCRCB and ACU has suspended motorcycle circuit racing events until the end of April, and to avoid the championship teams and competitors placing perceived or actual demands on the public healthcare services, **with effect from 19th March 2020 no testing is permitted until further notice for the BSB class.**

For classes outside of these testing regulations the sentiment above applies to all regarding the public healthcare services.

Ends.
