

PIRELLI BSB Range 2021

Pirelli National Junior Superstock

Silverstone Official Test – 190/60ZR17 Diablo Supercorsa V2

Pirelli will supply the 190/60ZR17 size rear tyre for the Silverstone Test. This is the only size that will be supplied by the service for use at this test.

The use of this size will be mandatory for Thruxton Rd 4 & Silverstone Rd 8.

This specification has a centre diameter of 662mm (6mm increase compared to the standard tyre).

The normal production 180/60ZR17 Diablo Supercorsa V3 SC2 will be made available at the subsequent Snetterton test.

Note – Pirelli's recommended minimum 'in service' pressure (1.65 bar) must be observed.

To clarify, this is the minimum tyre pressure accepted to pass the grid test procedure and is not a suggested optimum on track pressure.
