

PIRELLI BSB Range 2022

Bennetts British Superbike Championship

Silverstone Rd1 & Thruxton Rd 6 - 200/65R17 Diablo Superbike SC0

Please note that the SCX option **will not** be made available for BSB Rd1 & BSB Rd 6.

The standard SC0 compound (as used in 2021) will be available for these events.

Note – Pirelli's recommended minimum 'in service' pressure (1.65 bar) must be observed. To clarify, this is the minimum tyre pressure accepted to pass the grid test procedure and is not a suggested optimum on track pressure.

If further information is required please contact Jason
